

I am a driven and organized student who is committed to always doing my best and trying my hardest. When faced with adversity instead of cowering away I face that challenge head on with everything I have. During group work I tend to take the leadership position and try to get the task done by delegating but I am also comfortable being a team player and not taking the lead. I am able to adapt to any given situation and be the best possible version of myself. While I enjoy teamwork and often thrive in it I am also comfortable being independent and doing independent work. No matter the given task I will do my best to complete it as I am very hardworking.

I am committed to constantly improving myself and continuing to learn. In the summer of 2019 Instead of having a traditional summer I spent six weeks and a pre-college program in Savannah, Georgia. During that time I was able to take two college courses, photography and advertising, and fully immerse myself in the college experience. During this time I made sure to step out of my comfort zone and be adventurous. One of my more interesting outings was kayaking. While this may not seem like a very big feat it was for me as I had never gone kayaking. Yet during the kayaking adventure I was able to realize that I was stronger than I thought.

I have worked with many Adobe products such as Illustrator, and Animate but I am highly skilled in Photoshop and Lightroom. I am also skilled in Microsoft products such as Word and Powerpoint. Deviating away from online programs I am also skilled in Photography, both film and digital.
